Solarix P Series

1/2/3 kW

SOLAR INVERTER

TÜRKİYE ŞARTLARINA TAM UYUMLU
COMPATIBLE TO THE CONDITIONS OF TURKEY

Pure sinewave output
Full compatibility with all kinds of electrical devices, the ideal solution for your critical applications.

Wide input voltage range (90-280 VAC)
The ability to work online in electrical household appliancesat voltages between 90-280VAC, in computer applications at voltages between 170-280VAC without switching to the battery.

Intelligent charging technology for optimal battery performance
Since Solarix solar inverters charge the battery with a 3-step battery charging algorithm, they extend the battery life, reduce your operating costs, and provide savings.

High performance microprocessor
Thanks to the digital structure and high speed of the CPU-controlled control board is provides full protection by performing the protection functions of the Solar Inverter such as overload, short circuit, low-high voltage and over-temperature in a timely manner, thus ensuring that the Solar Inverter has a stable and reliable structure.

RS-232 & USB communication port
To allow for unattended Solar Inverter to shutdown/start-up and status monitoring, connect the communication cable one end to the USB/RS-232 port and the other to the communication port of your PC. With the monitoring software installed, you can schedule Solar Inverter shutdown/start-up and monitor Solar Inverter status through.

PWM
Solarix MP Series 1/2/3 kW solar inverters have built-in 50A PWM charger.
